As part of our ongoing mission to provide simple, consistent services to students, faculty and staff, we are pleased to announce the launch of "AU Wireless".

The purpose of AU Wireless is to provide identical, self-service access to wireless systems on every campus, allowing you to use only your normal user AUeID and password to login to the network. This eliminates the need for a new user to locate a technician to configure their machine for wireless access. And because the setup is the same for every campus, once a user has logged into a wireless network for the first time, their computer will subsequently connect to their appropriate wireless network on any AU campus.

While on campus, you will see the following three options for a wireless connection:

AU_Guest	A network that does not require a login, but only has access to basic Internet services.		
AU_Student	A network that requires a student AUeID and password, and provides access to		
	services appropriate for students.		
AU_Staff	A network that requires an employee AUeID and password, and provides access to		
	services appropriate for employees.		

First-time Staff and Student users must (one time only) connect to the **AU_Guest** network (because it doesn't need a username and password), or use a wired connection, for the initial setup. (You can even do this initial setup from home!) Once on the network, open a web browser and go to:

http://wireless.antioch.edu

where you will see the following screen:

Click on Staff or Student as appropriate. (You must have appropriate credentials!) The application will then display a screen identifying the operating system detected. Your exact screens may differ slightly from the ones shown here.

Antioch University • 888 Dayton Street • Suite 102 • Yellow Springs, OH 45387 Phone: 937-769-1340 • Fax: 937-769-1350

Welcome to the configuration and connection technology for the AU_staff secure wireless. You may see a warning about the installation of

the Antioch University certificate. Accept the installation. Enter your AUeID and password when

prompted.

You may get a warning or request to accept an AU certificate (this is a Windows example). Click on the **JoinNow** button to proceed.

Launching momentarily, some components will be downloaded. Grant Java and User Access Control permissions as needed.

If you can see a "Missing Plug-in" or "Inactive Plug-in" message below, simply click the arrow to download and install Java. After the installation is complete refresh this page to continue installation.

If the installer did not launch correctly click here to download the installer manually.

powered by securew2

Please **run** any applications if asked to do so. This can take some time. In the unlikely event that the installer does not run, click the red <u>here</u> link to download and run it manually. Once the installer runs, you will see the following screen:

ANTIOCH			
ANTIOCH UNIVERSITY			
Enter AUelD: Enter your Password:			
CONFIGURE AUTHENTICATE JOINED			
Help Next Cancel			

Enter your AUeID and password, then click **Next**. (You may be asked about the Antioch University certificate. Please accept it.)

Once the installation is completed you will be logged onto the **AU_Staff** or **AU_Student** wireless network.

AUDirect LOGIN	AUEID (7 digit user id + password)	Your
User ID:		<u>http</u>
Forgot User ID	Login	You to go

our web browser will be redirected to AUDirect:

https://audirect.antioch.edu

You can log into AUDirect if you wish, or use your browser to go elsewhere.

Your wireless setup is now complete. From now on, you will automatically connect to the **AU_Staff** or **AU_Student** wireless network whenever you are in range.

If you have a problem with the installation please contact the Help Desk at 1-866-662-0056 or on the web: <u>http://helpdesk.antioch.edu</u>
